

Epos System

Gun stock control

Multi Retail

Improve Stock Control with a stock gun, have information available at your fingertips.

As a user you are often caught between serving at the tills and being in the office, and mobile computing puts you right in front of your stock when decision making. This has been the case for some time with stock taking handsets. They link wirelessly to the back office you get space to search and see information on a real time basis. The main use is to stock count, but can also be used to make batches for use by purchase orders, goods inwards and stock adjustments. Now you can do office based tasks on the sales floor.

Profitable Epos
made simple...

Reasons for buying epos

1 Mobile

Provided you have wifi coverage you are free work anywhere in the store. This saves being in the office and unavailable to serve customers whilst counting.

2 Immediate effect

The information you alter is immediately changed, there is no need to download or run an update program.

3 Speed of counting

The one system can handle multi guns counting at the same time. This gets away from having to find the item on a sheet or even writing it out by hand.

Menu

Firstly you will need to select a program function from the list available in the menu.

Stock Enquiry

Scan the barcode and if on the system the stock level, sell price and background details are displayed.

Stock Control

The adjustment to stock level or sell price will take effect as soon as entered and can be a correction to or replacement of the stock balance .

OpenXpos - Batch Entry

PESTCLEAR OUTDOOR PEST REPELL

Sell	<input type="text" value="38.95"/>	<input type="text" value="39.99"/>
Qty	<input type="text" value="2"/>	<input type="text" value="2"/>

Batch No: 1
Batch Ref: Out Door

Stock Adjustment

The adjustment to stock level will take effect as soon as entered against the stock balance .

The adjustment handles stock that is taken out for own use such as display or sampling, and wastage too .

Batch Processing

A batch is essentially a working list of selected products.

Which program it is used in determines the outcome whether that be for purchase orders, goods inwards, label requests .

Benefits of the system

1 Batches

Using the gun to produce batches means it isn't just used for stock counting but is used week in and week out as a working tool.

2 Additional Information

Whilst working with products it can often be useful to see sales figure, stock levels or even a picture .

3 Audit Trail

By using the gun to counting you will automatically be getting an audit trail report for your accountants of the whole process, including the final valuation
