Wifi Mobile Label Printing

The QLn220 is a semi rugged mobile direct thermal printer designed to allow you to print product labels on the shop floor without needing to queue labels and return to the office to print them.

The QLn220 works seamlessly with the Zebra Workabout Pro to print product labels and price reduction labels. There is no need to purchase any other software as the label formats are preloaded in the system.

Both the QLn220 and the Workabout Pro can be added easily to your existing Wi-Fi network and both support the latest security and encryption standards.

If labels are required for permanent outdoor use then they can be queued up on the Work About Pro and printed on a heavy duty desktop printer when ready.

Reasons for buying

1 Portable

Works over wifi to print labels where you are working

2 Links to Gun

Using our program on the Workabout Pro gun the product and price picked are sent directly to the printer

3 Label sizes

It can support a variety of different roll sizes with both indoor and outdoor adhesives available

4 Tried and tested

The zebra range has been performing this print role for years in supermarkets and distribution centres and is the market leader.

Features of the system

Radio Gun Handset

The Work About Pro has been used by Open Retail Solutions for over 10 years and over 150 units have been installed at various customer sites including Garden Centres, Plant Nurseries, Farm Shops and Delicatessens.

The Work About Pro can be used for many tasks within the retail environment including stock enquires, batch creation, labelling, purchase order generation, goods inwards tracking, stock taking and price reductions.

Multiple handsets can be used within your store at the same time and work real time on the main database so all changes done are instant. This means there is no need to load the handset with data and download it again when in the office.

The Work About Pro links to the QLn220 printer via your Wi-Fi network and prints labels directly when requested.

Label Sizes

There are various standard size labels that are available for the QLn220 printer, each have their own uses, including shelf edge labels, product labels and pre-perforated split labels that can be used for price reductions. Colour can also be used on the labels to highlight prices. Zebra can quote for custom labels to any size and use your own company colours so please ask us for a quote and this can be arranged free of charge. Alternatively you can source your own custom labels from your existing label suppliers if the QLn220 is supported by them.

Standard Labels (430 per roll)

- ◇ 50.4mm x 25.4mm
- ◇ Permanent Adhesive
- ◇ Economy Labels
- ◇ Gloss Top Coat Labels
- ◇ Ploy Prop Labels

Hardware Partners

Open Retail works with business partners like Zebra to provide a complete one stop solution. Our partners are chosen very carefully, only including those companies who offer a very high level of service and reliability.

Accessories

A belt clip and shoulder strap are included as standard, but you can also add a carry case for harder working conditions and also a docking station to charge the printer, rather than using the AC adapter directly.
